

**From:** Claire Savy, Women in Fluid Dynamics UK SIG, 03/10/2024

**Subject:** Women in Fluid Dynamics UK survey

We are pleased to announce the launch of a national survey that will help inform the newly established Women in Fluid Dynamics UK Special Interest Group's (SIG) strategic direction, activities and priorities moving forward. Results may also be used to lobby for policy changes and additional funding support from academic institutions, industry partners and external funding bodies for women in fluid dynamics.

The survey should take approximately 15 minutes. **All** UK-based colleagues working in fluid dynamics in either industry or academia are welcome to respond. Question topics include: you and your role; your experience at work; career progression; barriers and enablers; priorities for the SIG.

We strongly encourage you to complete this survey, as the results will be used to guide our next steps, and ultimately should result in benefit to you, and the community of women working in fluids.

Please do share this survey with colleagues working in the discipline.

TAKE THE SURVEY: <https://reflections.agendaconsulting.co.uk/womeninfluids>.

- Deadline for responses: **extended to 11<sup>th</sup> October 2024**.
- Any queries please direct to [fluids-institute@leeds.ac.uk](mailto:fluids-institute@leeds.ac.uk).
- More information about the SIG may be found [here](#).

*SIG Leader: Dr Claire Savy, University of Leeds*

*SIG Co-Leader: Prof Aimee Morgans, Imperial College London*
