

**From:** Paul Tucker, University of Cambridge, 10/01/2024

**Subject:** Cambridge Unsteady Flow Symposium (CUFS)

A symposium will be held on 4th-5th March 2024 at Murray Edwards College, Cambridge. It will bring together international leading experts in CFD and promote panel discussions on numerical methods for unsteady flows.

Registration for the conference is now open – see [this page](#). There is an excellent international line-up of speakers with some amazing keynotes. It would be great if you could come.
